

CLOUD INVOICING AND ACCOUNTING PLATFORM

Designed for:

Self-employed

SME's

Accountants and
bookkeepers

REVISO CHARACTERISTICS

Complete stock management

Possibility of fully managing stock, including product loading operations, inventory removal and all merchandise movements between different warehouses or locations.

Complete management of the customer billing cycle

Reviso is a complete management software that supports you throughout the billing process: from the creation of your invoices, quotations and customer orders, to the registration of expense invoices and document storage without limits.

Accounting management and bank reconciliation

With Reviso you can easily and quickly manage all the daily activities related to the company's accounting: balance sheets, journals, general ledgers and bank reconciliation.

Tax compliance: VAT HMRC MTD Compliant

Reviso creates the monthly or quarterly VAT settlement, with all the details about the invoices included in the report, and allows creating the necessary file to send it and make its presentation to HMRC.

Project creation and management

Efficiently create and manage all business projects. For each of them, subprojects, objectives to be achieved, activities to be carried out, times, expenses incurred and resources involved can be defined.

Multi-company management, also with offices abroad

Thanks to the possibility of configuring the language and the capacity of the platform to adapt to the taxation of different countries, with Reviso you can manage your business with offices abroad.

ARE YOU AN ACCOUNTANT?

Use Reviso in collaboration with your clients and directly access their accounts to supervise them

Thanks to the multi-user option and collaborative management of the software, you will be able to support the management of your clients' accounting activities, help them in billing management and offer them the best advice they need. Thanks to Reviso, the relationship with your customers becomes simple, fast and immediate.

THE ADVANTAGES

Accounting managed simply and efficiently

The intuitive interface streamlines the registration of invoices, receipts and payments and the control of bank transactions. Furthermore, reports such as financial statements, ledgers or VAT reporting are also standard.

In addition to accounting, it controls business performance

Additional features of budget control, revenue and cost centre evaluation, and project profitability analysis allow the company to better monitor business performance.

Effective collaborative work between the company and the accountant

Thanks to collaborative management, **the accountant can access the platform** from any device (PC, tablet or mobile phone) to verify **and evaluate the accounting situation of the company** in real time.

Real-time data analysis

Documents available at any time. Immediate access to the data, always up-to-date and also presented in different reports, allows us to be constantly informed about the progress of the company and to carry out a daily support consulting activity.

Documents accessible at any time

Original documents uploaded as digital files (either in PDF or JPG format) **can be consulted at any time** to verify their content.

OPINIONS FROM REVISO USERS

Thanks to Reviso I can access my company data even when I am abroad, and I can control my projects very easily. With Reviso, the accounting management of my business has become much more efficient than before. I recommend it!

Entrepreneur

I quickly appreciated the ease of use in Reviso. The interface of the platform is very well designed and the functions are easily accessible. Very complete for my business needs.

Self-employed

Reviso is a very good platform for accounting management. Vendor configuration is very easy and allows you to define all the necessary fields to later save time in the registration of invoices.
